The COMPLETE BOLTLESS STEEL FRAMING

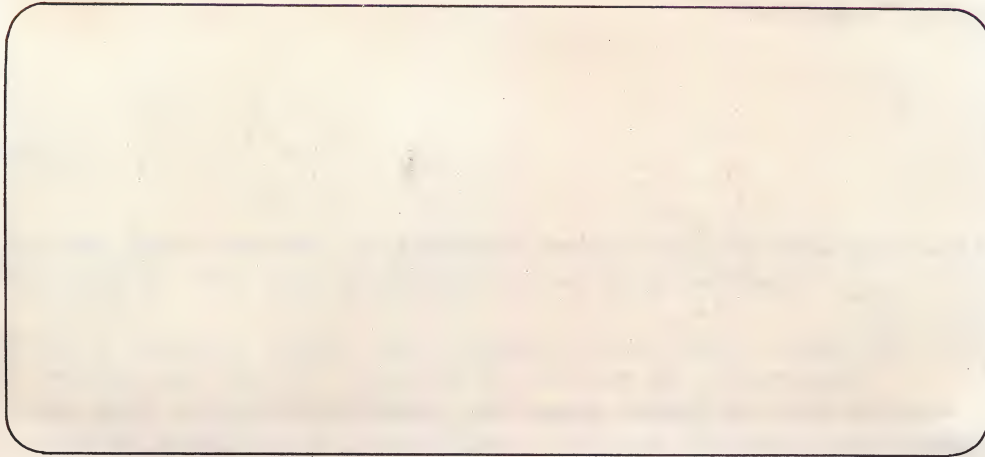

BARTON-KING SYSTEMS

REPORT ON KING SYSTEMS

CONDUCTED BY THE KING SYSTEMS RESEARCH CENTER

DATE: 10/1/77

Page 1

1. Introduction

The purpose of this report is to provide a detailed analysis of the King Systems research center's findings. The study was conducted over a period of six months, from January to June 1977.

2. Methodology

The research was conducted using a combination of qualitative and quantitative methods.

3. Results

The results of the study are presented in the following sections.

4. Discussion

The findings of the study are discussed in the following sections.

5. Conclusion

The study concludes that the King Systems research center has made significant contributions to the field of research.

BARTON-KING SYSTEMS

MANUFACTURERS OF RIVETIER STORAGE SYSTEMS

A DIVISION OF NEW IDRIA, INC.

1532 South California Avenue
Monrovia, California 91016
Phone: (213) 359-4522
(714) 879-7412

Gentlemen:

Thank you for your interest in RIVETIER Record Archive Storage Racks.
We are pleased to send you literature about this product.

RIVETIER is a boltless steel frame supplied in a wide range of heights, widths and depths designed to provide an economical solution to most storage problems. It lends itself to the storage of such diverse material as X-ray film, inactive records, engineering and computer data, manufacturing items, general maintenance parts as well as bulk storage.

We welcome the opportunity to help you solve your specific storage problems in a practical and economical manner. Why not contact us today?

Yours truly,

BARTON KING SYSTEMS

LOW PROFILE SHELVING

LOW COST
SIMPLE SET-UP
MAXIMUM USE OF SPACE

RIVETER's newest development is the special shelf support beam. Designed for maximum strength and minimum size (shelf and support are only 1-1/8" deep), it provides steel-clad protection for the shelf edge. The new support beam is a perfect match for the strong, durable, inexpensive particle board shelf.

RIVETER's advanced engineering has created structurally strong, quality shelving at a very low cost. Bolts, nuts, clips and sway-braces have been eliminated. Set-up time has been cut by more than half. . . and the only tool required is a hammer or mallet.

RIVETER's Low Profile Shelving allows full use of available storage space. Units can be ordered to fit just about any available floor space and they can be ordered up to 15 feet high — without splices. Even at a height of 15 feet they don't need sway-braces. There is unobstructed shelf access from all 4 sides and additional units can be added to any side to obtain necessary depths.

LONG SPAN RACKS

MAXIMUM USE OF SPACE,
HIGH LOAD CAPACITY,
FLEXIBILITY

RIVETIER has a fast, simple, economical solution no matter what your storage problem. Spans up to 8 feet; vertical shelf adjustment in 1½ inch increments; heights up to 15 feet without splicing and depths to 4 feet. Economical shelf surfaces such as particle board, plywood and lumber are a perfect match for Long Span. With RIVETIER shelving you can make use of every cubic foot of space – all the way up to the ceiling.

RIVETIER Long Span Shelving provides maximum use of available space for small parts stocking or bulky storage. All items are readily accessible from any side. Storage is always neat and orderly.
